SMALL BINS

PRODUCT APPLICATION BULLETIN

Model BVS-130 Silent Turbine Vibrator

Technical Specifications

- 10,500 VPM at 80 PSI
- 75 lbs. of force
- 5.5 CFM at 80 PSI
- 67 dB at 80 PSI

PROBLEM

Ball bearing manufacturer was having problems with the bearings clogging in the chute to the feeder tray below. They had to keep shutting the line down to manually clear the chute and as a result, were losing significant production time.

SOLUTION

They installed the **VIBCO BVS-130 Silent Turbine vibrator** and now experience little or no **clogging** in the chute. The ball bearings pour smoothly and more quickly to the feeder tray below and **they no longer have to shut down the line to clear the chute.**

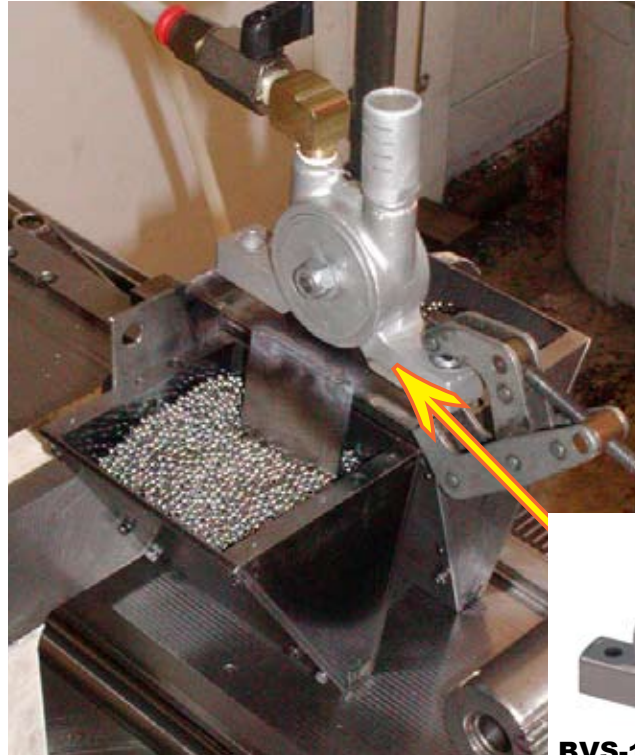

BENEFITS

After installing the BVS-130 Silent Turbine vibrator the customer received the following benefits:

- Increased feed rate of ball bearings
- Increased production with less down time
- Reduced loss of man hours needed to unclog the chute

These Also Work:

- BBS-130 - single bolt mount, easily adaptable to save space
- SCR series or SPR series - electric, single phase operation, adjustable speed & force for easy adaptability in many applications
