MOBILE BINS

PRODUCT APPLICATION BULLETIN

Model BVS-320 Silent Turbine Vibrator

Technical Specifications

- 6800 VPM at 80 PSI
- 600 lbs of force
- 10 CFM at 80 PSI
- 70 dB at 80 PSI

PROBLEM

This manufacturer was wasting product due to cross-batch contamination. Their bins would not empty completely before they moved them to the next station for mixing different product batches. Workers had to clean bins out by hand to ensure all materials were emptied.

SOLUTION

They installed a **VIBCO BVS-320 Silent Turbine vibrator** and were able to maximize the **material flow**, ensuring the bins were completely emptied at the end of a station batch run. They no longer had to deal with contaminated batches or manual bin cleaning. This all served to **increase productivity and save the company money**.

BENEFITS

After installing the BVS-250 Silent Turbine vibrator the customer received the following benefits:

- Increased productivity with ease of bin transfer from station to station, batch to batch
- Reduced product contamination, meaning reduced waste
- Reduced lost man hours used for manual emptying of bins

These Also Work:

- MLT-S/S, MLT series - stainless steel, anti-corrosive housing, ideal for sanitary environments
- SCR series - adjustable speed & force for easy adaptability in many applications, continuous duty
