Bulletin #418
Model VC-130
Pneumatic Ball
Vibrator with Vise
Grip Bracket System**

VIBCO'S SOLUTION

One model VC-130 VIBCO Pneumatic Ball Vibrator with a Vise Grip Bracket System was quickly and easily attached to the seam of each form. The vibrator was extremely easy to mount and move up and down the seams. The pedestals now come out smoothly and perfect every time, with no rubbing or filing required after the forms are stripped. And the customer tried the bracket and vibrator on their other forms and obtained the same positive results.

VIBCO'S BENEFITS

After installing the VIBCO VC-130 Pneumatic Ball Vibrator the customer received the following benefits:

- Increased customer satisfaction
- Dramatic improvement in product quality
- Increased production

VC-130

ORNAMENTAL FORMS

"We were getting air bubbles..."

Ornamental concrete can present some unique challenges. We were making tall pedestals and were trying to use internal vibrators. They just weren't working out as we had hoped - we were getting air bubbles and other imperfections in the finished product, as well as form damage. But because of the shape and size of the form, there didn't appear to be a way to mount a vibrator to the outside. You can imagine our excitement when we learned that VIBCO had the solution with their 'Vise-Grip' bracket system!" Plant Manager
Hank S., Pennsylvania

Model VC-130

Pneumatic Ball Vibrator with Vise-Grip

- 15,000 VPM
- 7.5 CFM
- 800 lbs of force
- 72 dB on A-Scale at 1 meter
