

Do screen clogs have you screaming mad? VIBCO can sift out your problem quietly.

SILENT
We're the Vibrator Guys.™

Product Application Bulletin #428 Model BVS-190 Silent Pneumatic Turbine Vibrator

VIBCO'S SOLUTION

VIBCO's BVS-190 Silent Pneumatic Turbine Vibrator was installed directly onto the screen deck, providing just the right amount of vibration amplitude to allow the sugar to pass through the screen into the chute below. Employees no longer had to stop production to manually clear the screen, making the VIBCO BVS-190 an inexpensive solution to the problem.

VIBCO'S BENEFITS

After installing the BVS-190 Silent Pneumatic Turbine Vibrator the customer received the following benefits:

- Significantly reduced product loss with continuous flow to the reclaim chute
- No more manual clearing of the screen, which means more efficient use of man hours
- Clean, sanitary solution - the vibrator does not add any potential contaminants to the process

SCREEN

“Our sugar reclaim screen would clog...

and we were losing valuable product to the clogs, overflow and contamination. The screen would get jammed with sugar from the rotary sifter above - it would feed faster than the screen could clear itself. We would have to shut down the line to do manual clears - which was obviously a giant waste of time and product. I'm so glad that our equipment dealer recommended that we mount a VIBCO vibrator onto the screen. It's totally solved the problem, and with the hosed exhaust, the air is ported to a remote location so that there's absolutely no contamination!”

Bakery Manager,
James W., New York

Model BVS-190 Silent Pneumatic Turbine Vibrator

- 7200 VPM
- 270 lbs of force
- 8.5 CFM at 80 PSI
- 71 dB on A-Scale at 1 meter
