

Do chute and funnel clogs have you popping mad? VIBCO has a smart (and silent) solution.

We're the ^{SILENT} Vibrator Guys.™

Product Application Bulletin #449 Model SPRT-21 Small Impact Electric Vibrator

VIBCO'S SOLUTION

A VIBCO SPRT-21 Small Impact Electric Vibrator was mounted to the side of the popcorn funnel. Now the material flows freely and never clogs. This has dramatically increased production, reduced wasted labor time and improved this customer's overall fill and production rate. The silent vibrator operation allows the customer to maintain a safe and quiet work environment.

VIBCO'S BENEFITS

After installing the VIBCO SPRT-21 Small Impact Electric Vibrator, the customer received the following benefits:

- Increased production rate with dramatically improved material flow
- Eliminated man-hours lost to manually clearing clogs
- Quiet and safe work environment with dB levels way below OSHA standards

SPRT-21

HOPPER VIBRATORS

"Popcorn kept getting stuck in the funnel..."

The irregular shapes have a tendency to lock together and clog the feed funnel. Our fill and production rates were suffering, and that was costing us money. We were also losing labor hours to clearing those darn clogs. Somebody needed to stand next to the funnel and bang on it until the popcorn started flowing again. When I think of what we spent on labor alone before contacting VIBCO... Let's just say the vibrator would have been a bargain at 10 times the price... and its quiet operation is amazing. Thanks for all of your help!"

Production Manager
Victor J., Indiana
