

Dump trucks spending more time in the shop than on the job? Shake it, don't break it with VIBCO's **BIG BERTHA™!**

We're the Vibrator Guys.™

Product Application Bulletin #489 Model DC-3500

VIBCO'S SOLUTION

A VIBCO DC-3500 Big Bertha™ 12V DC Dump Body Vibrator was installed. All tailgate slamming was virtually eliminated. Body hoists no longer needed to be stretched beyond their stage stop limits, reducing wear and tear, and reducing the risk of roll-over. An added benefit of the Big Bertha™ vibrator is that spreading can be done while dumping, further reducing truck time and man hours, and increasing the number of loads dumped in any given day.

VIBCO'S BENEFITS

After installing the VIBCO DC-3500 Big Bertha™ 12V Dump Body Vibrator, the customer received the following benefits:

- Dramatically reduced the number of costly repairs
- Increased the number of loads per day
- Greatly reduced the risk of roll-over
- Improved safety by eliminating the need for employees to crawl into dump bodies to remove stuck materials

Dump Body

"Tailgate slamming and over-extended hoists were causing a lot of damage...

We were constantly repairing tailgates, body hinges, linkages, lights, hoist packing glands... the list goes on. Equipment was being abused, we had a lot of downtime for repairs, and we were completing fewer loads per day which all meant lower profits. The VIBCO Big Bertha™ Vibrator literally paid for itself in just two weeks on the job!"
